

Exercise with my “Avatar” – Opportunities for Telerehabilitation in Cardiovascular Disease Rehabilitation (*PATHway as an example*)

Coordinated by: Dr Kieran Moran

School of Health and Human Performance; INSIGHT Centre for data analytics

H2020 PATHway Grant Agreement 643491 (www.PATHway2health.eu)

CARDIAC REHABILITATION

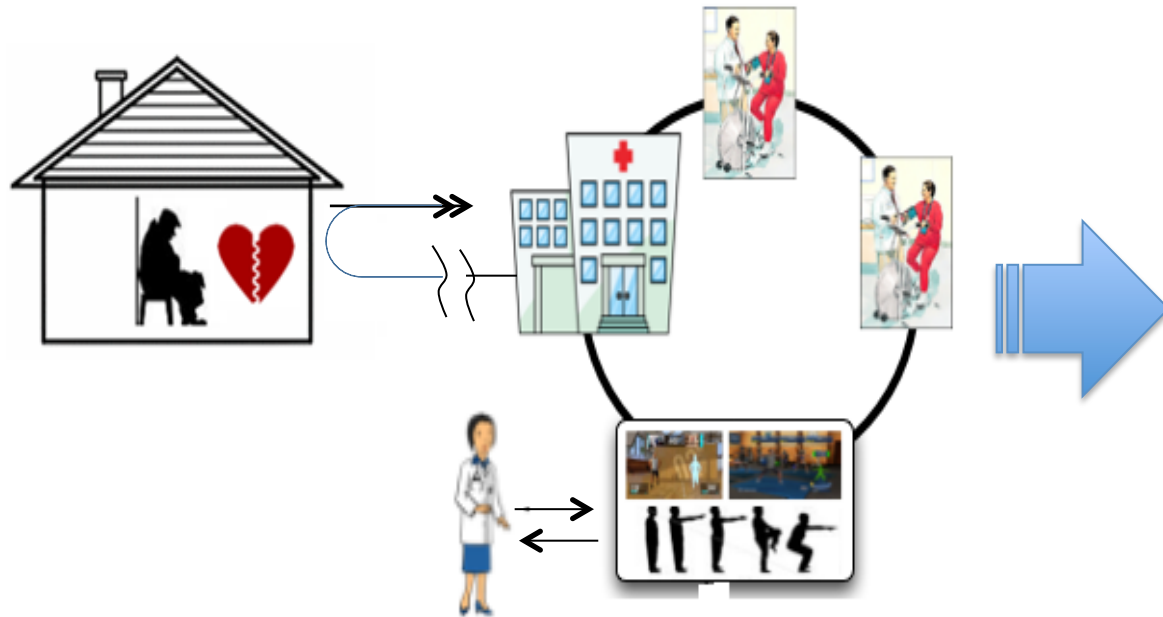

Take Your Recovery To Heart

Physical activity alone reduces premature death by 24%

Usual care

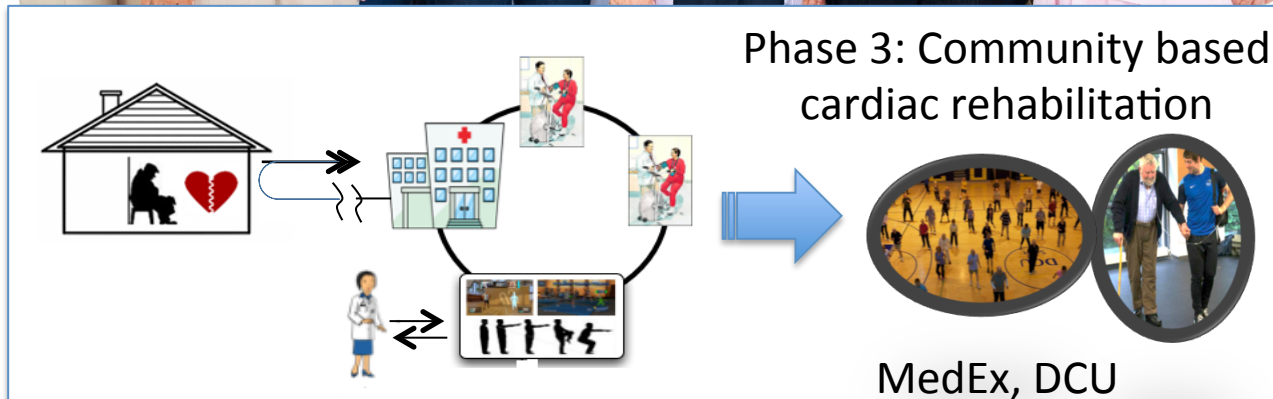

Phase 3: Community based cardiac rehabilitation

MedEx, DCU

Phase 2: Out-patient cardiac rehabilitation

Problem: *Only 10% of patients recovering from CVD attend Cardiac Rehabilitation programmes in the community (phase 3)?*

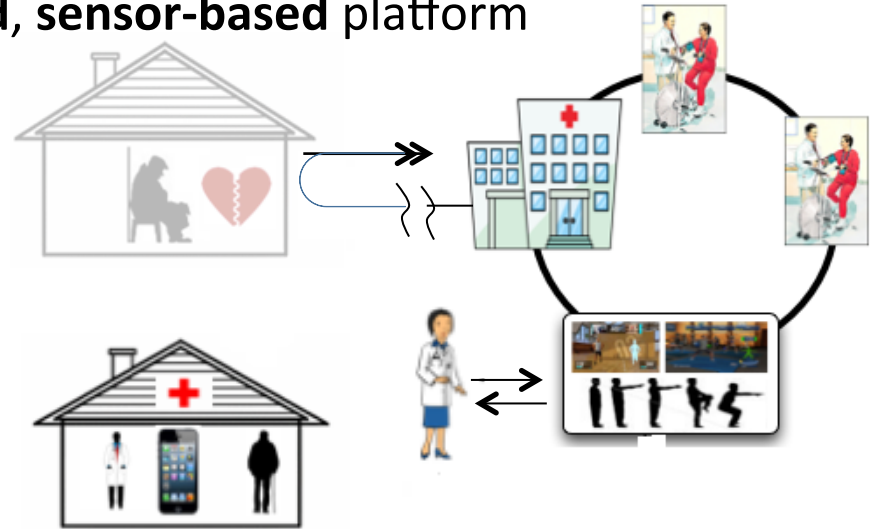

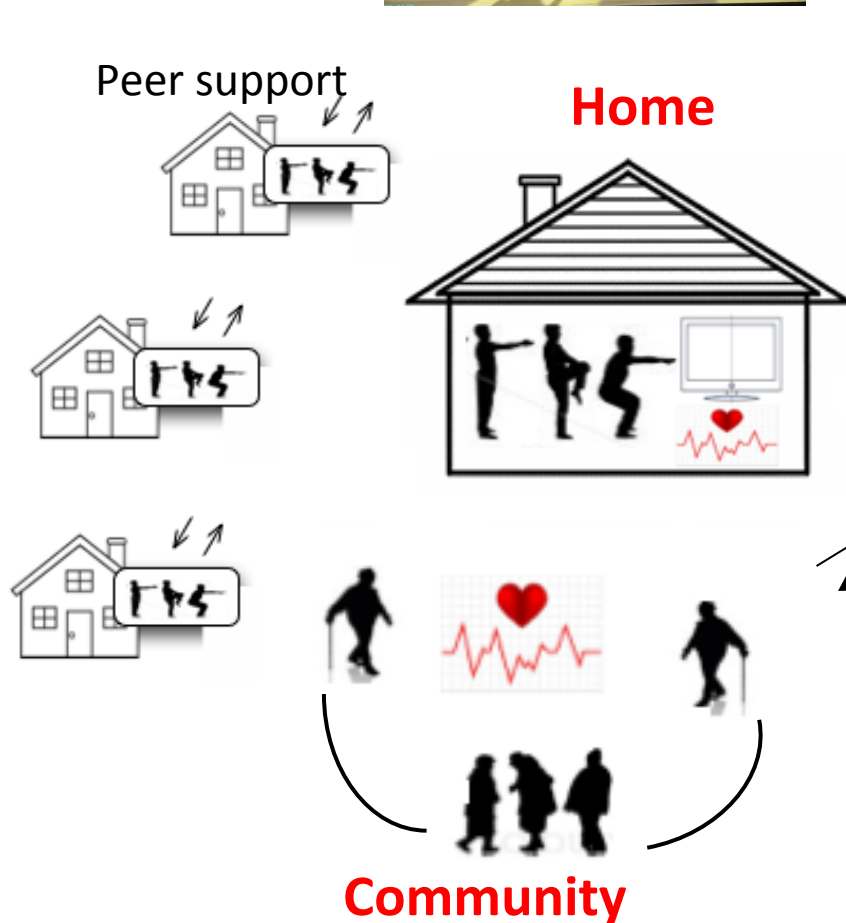

PATHway: allows remote participation in an individually tailored Cardiac Rehabilitation exercise program at any time from their **own home** or in their **own community** via an **internet enabled, sensor-based** platform

Peer support

society-level
"crowd-researching"

4 Key drivers to maximise effectiveness

Behavioural Change Theory

Self-managment of condition through (self-) empowerment

Peer support / Social interaction

Individualised

Technology is the **facilitator** not the driver

4 Key drivers to maximise effectiveness

Behavioural Change Theory

Self-managment of condition through (self-) empowerment

Social interaction

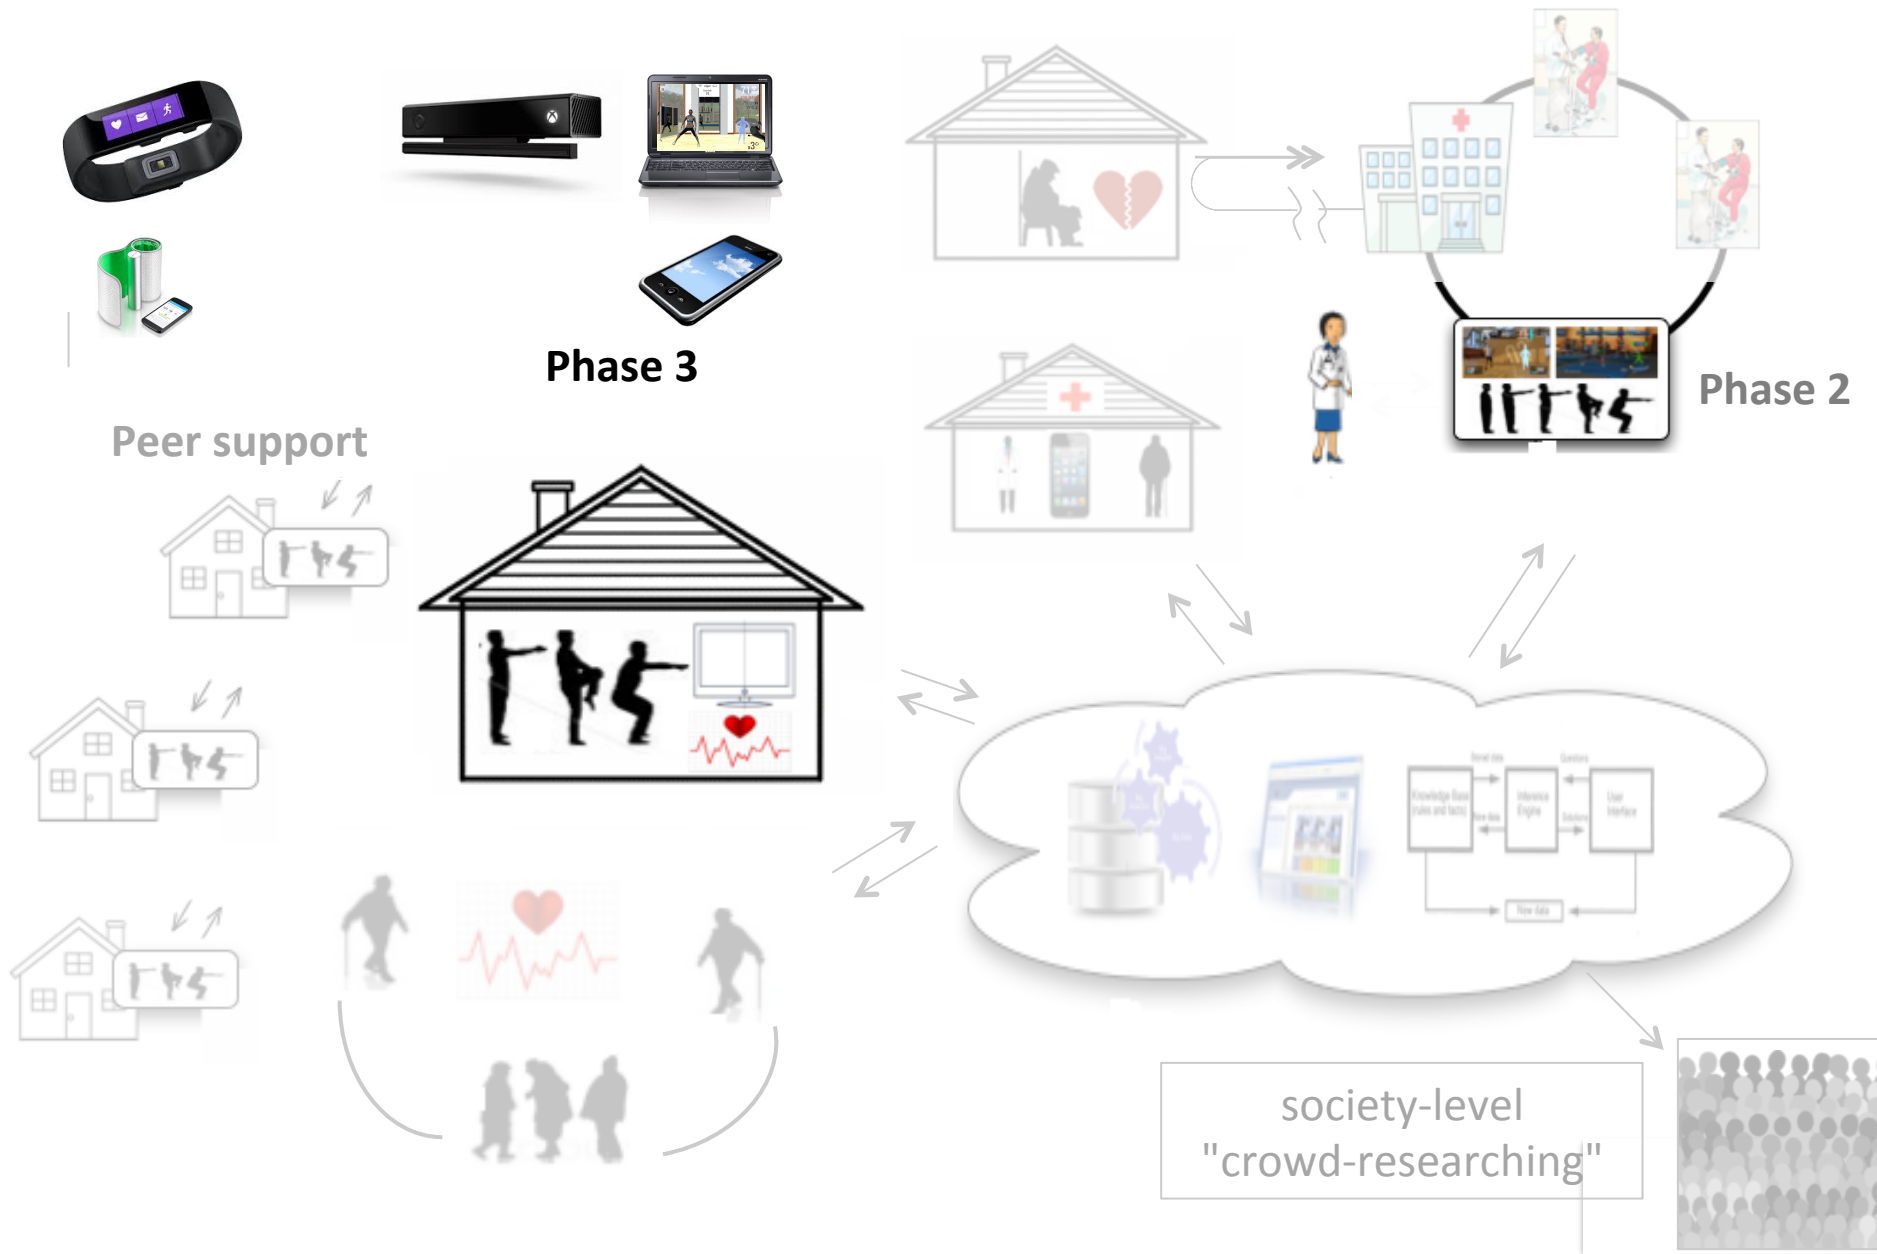

Personalised

Education

**Patient and Stakeholder
design driven**

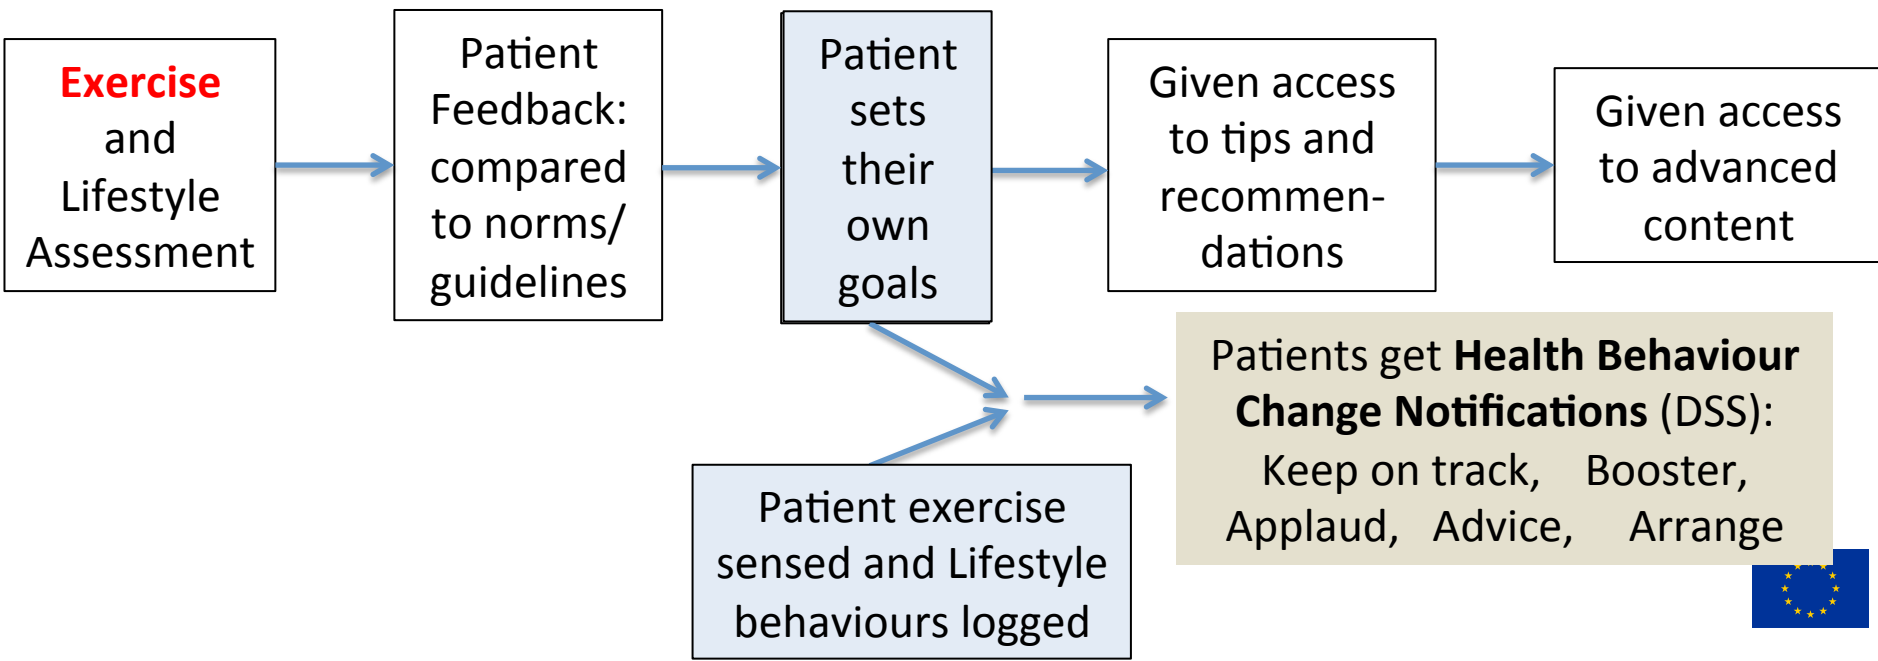

PATHway in more detail

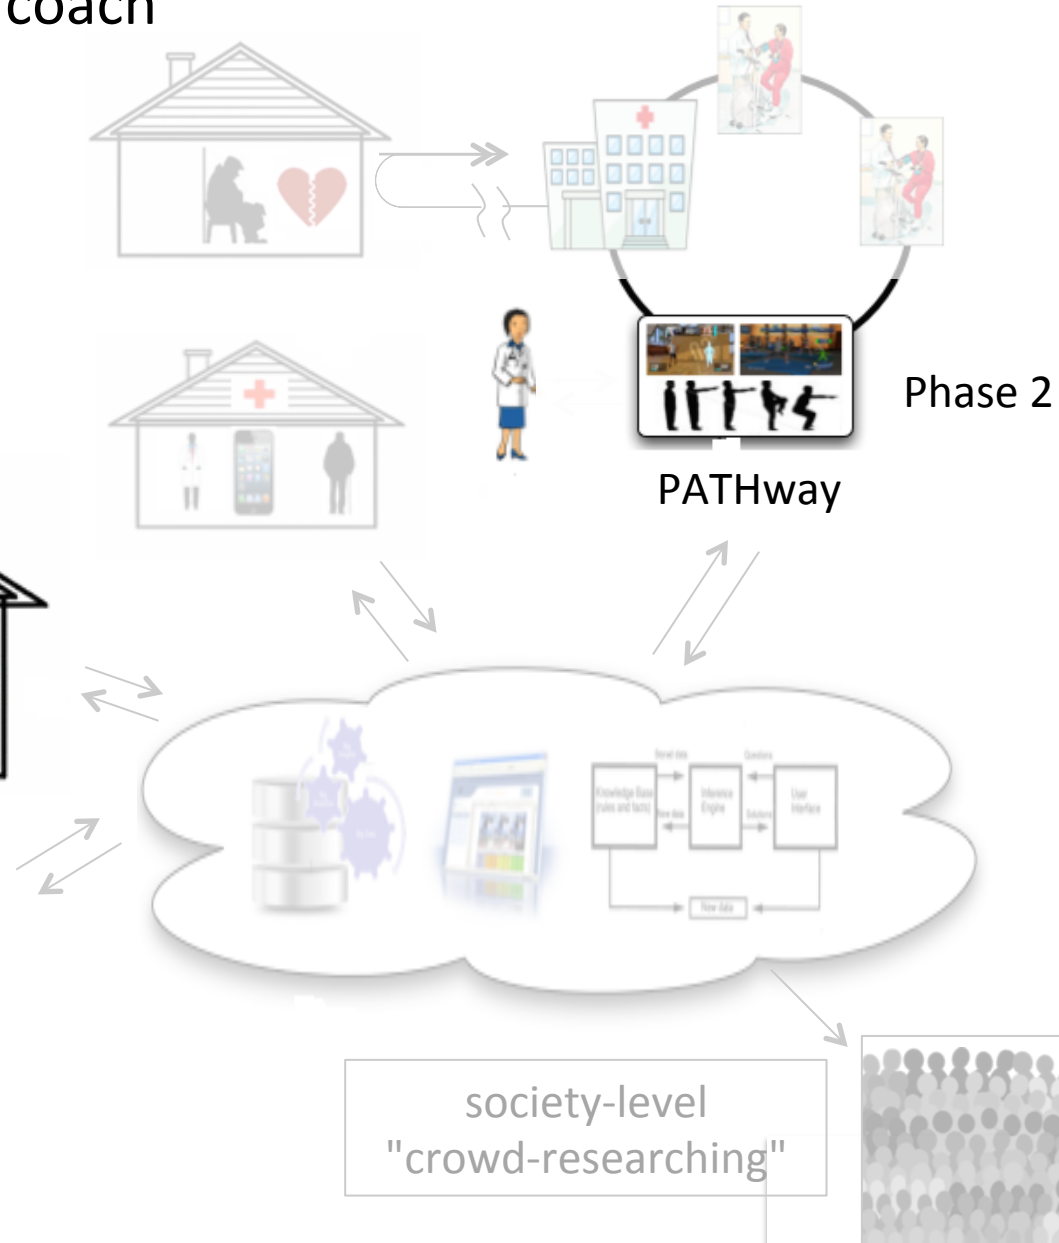

We also target Life-Style change

Exercise programme and goals: developed by the patient in collaboration with a clinical nurse (ExerClass and ExerGame) delivered by a virtual 'Avatar' coach

Peer support

Automatic monitoring: exercise movement and physiological response and social interaction and level of enjoyment.

Peer support

Phase 2

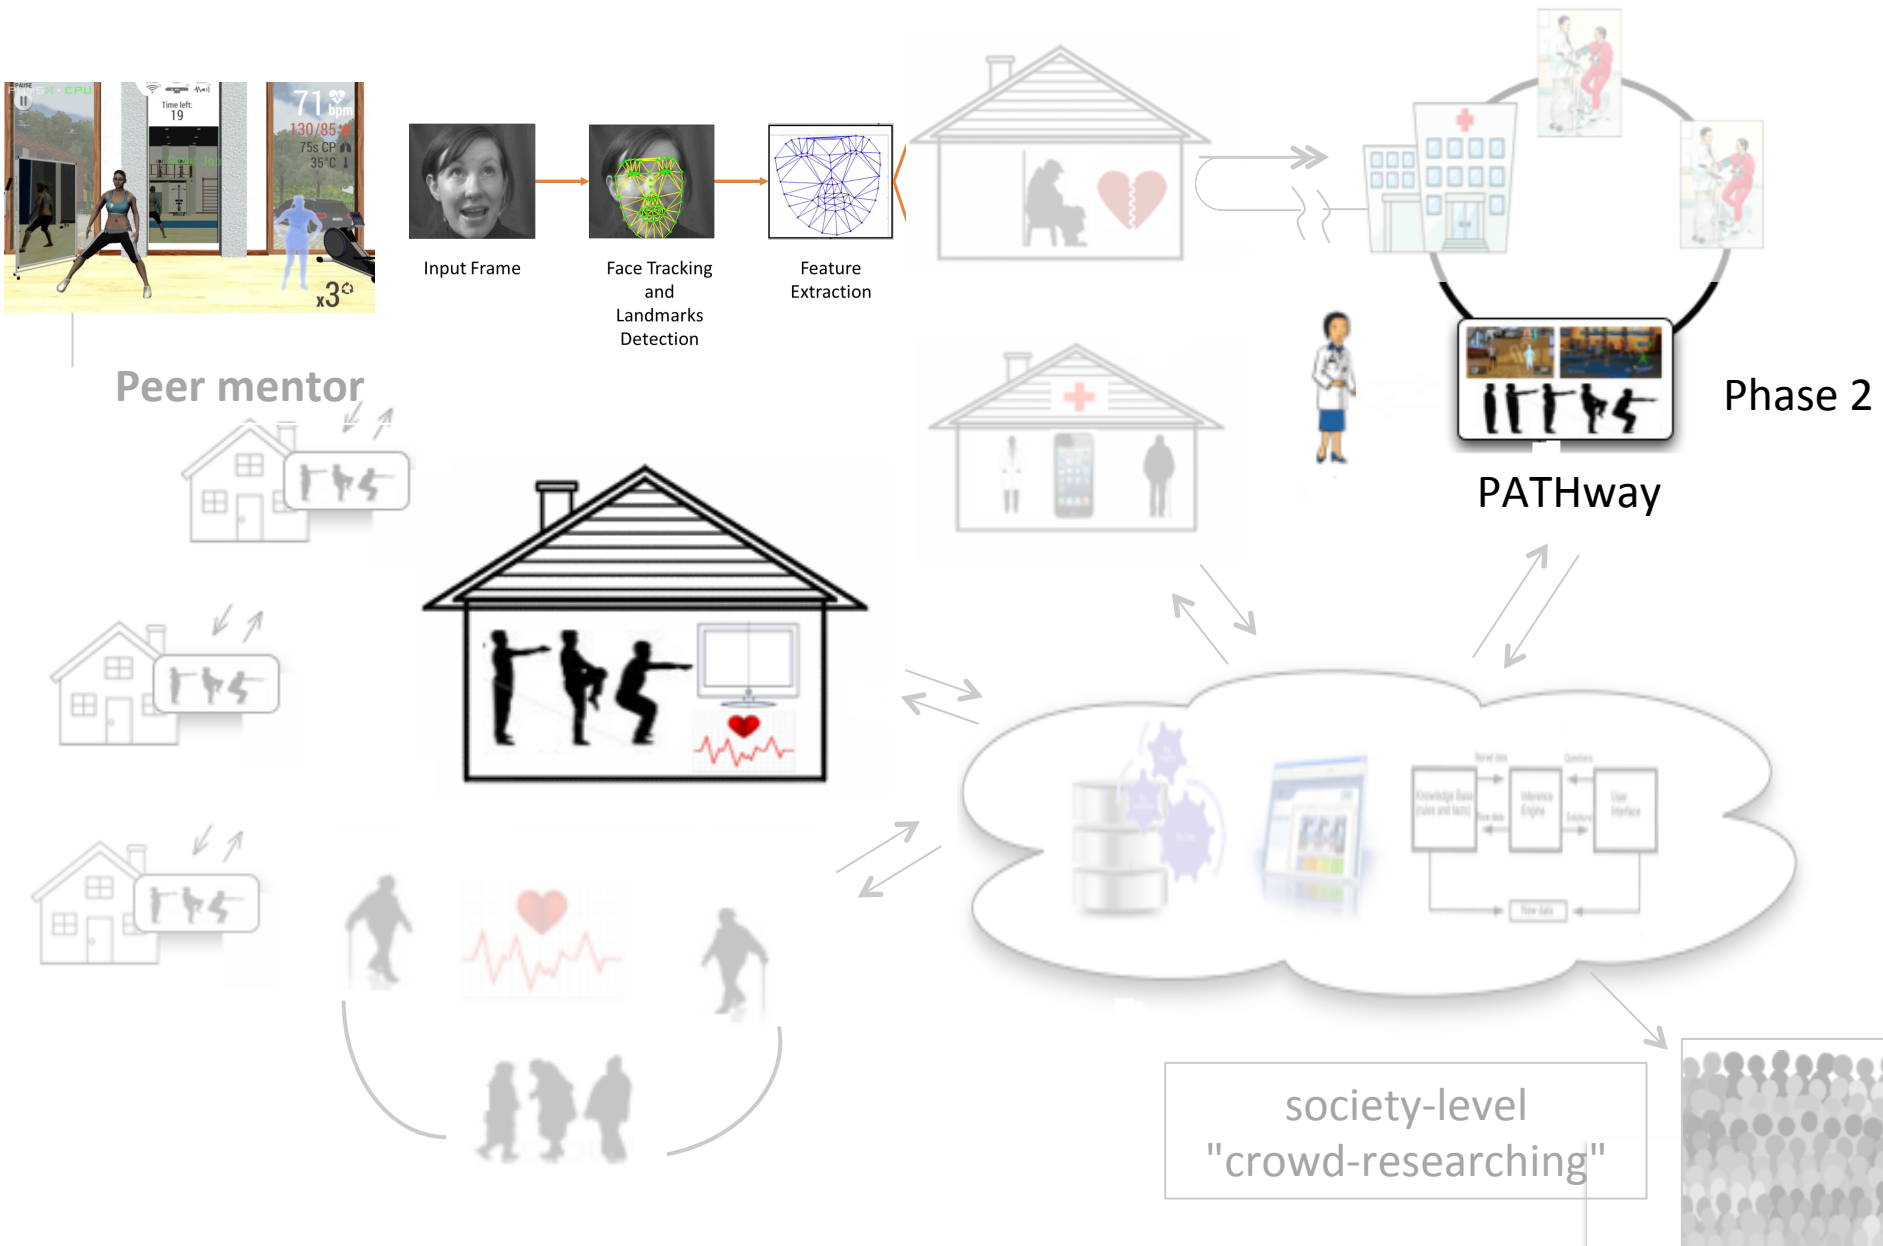

PATHway

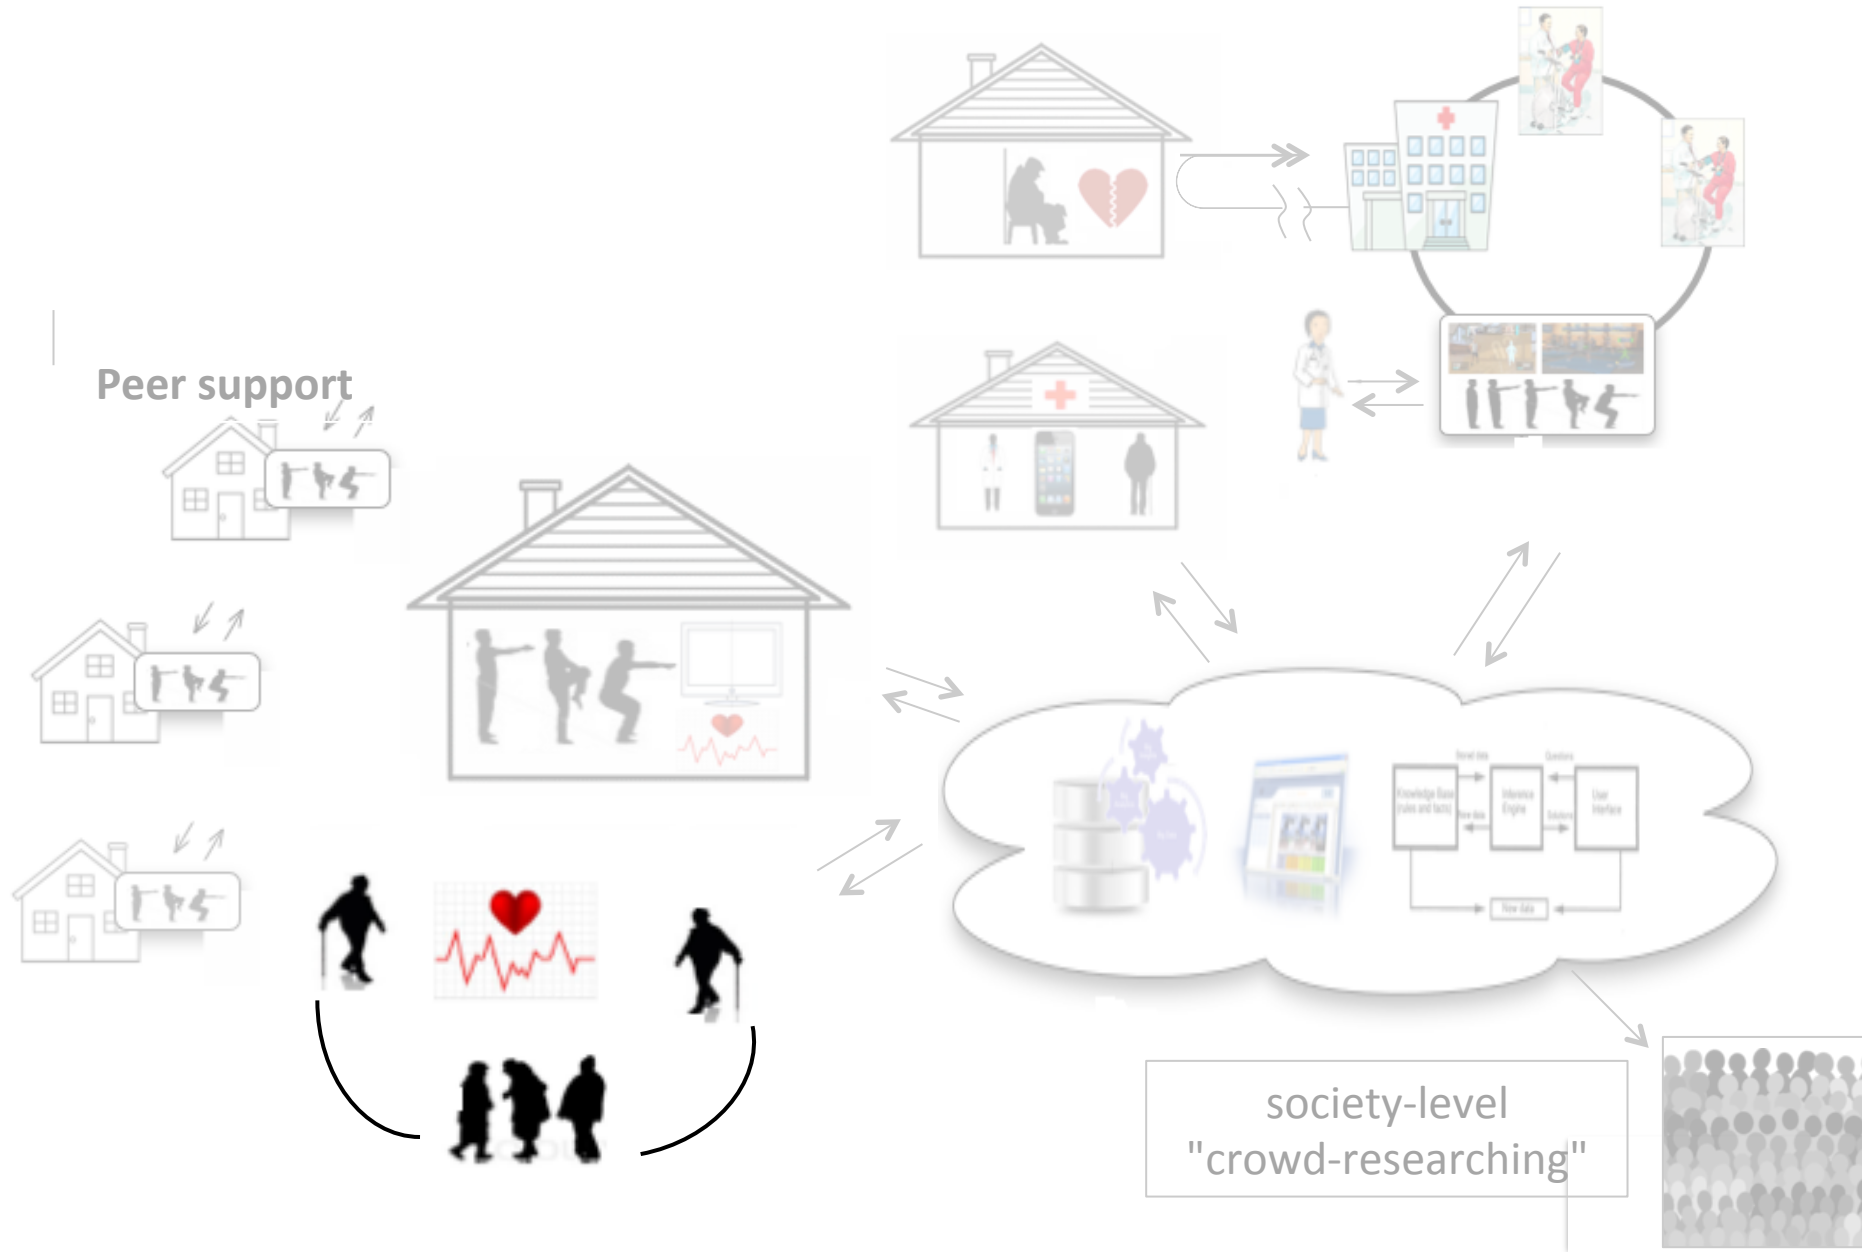

society-level
"crowd-researching"

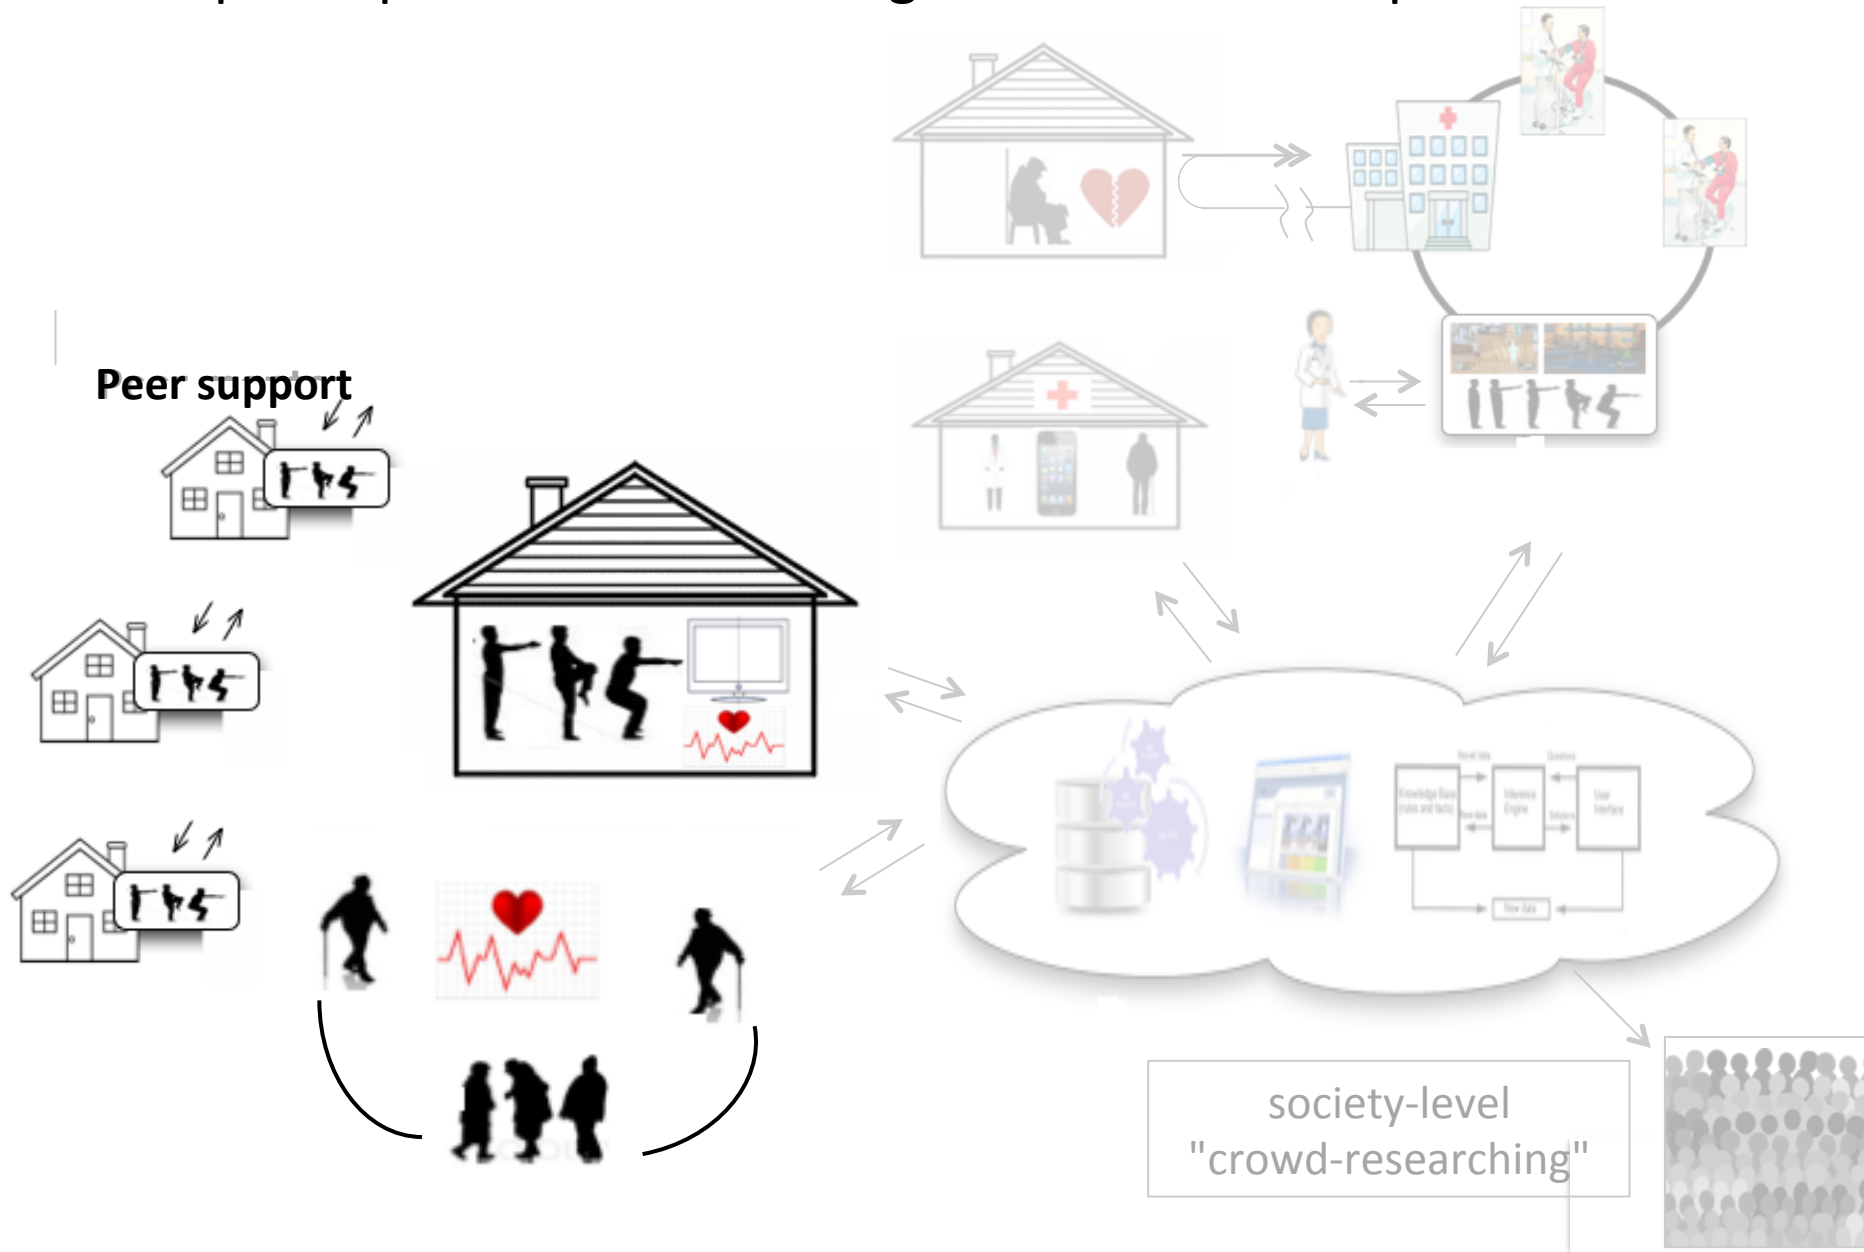

Automatic monitoring: exercise movement and physiological response and social interaction and level of enjoyment.

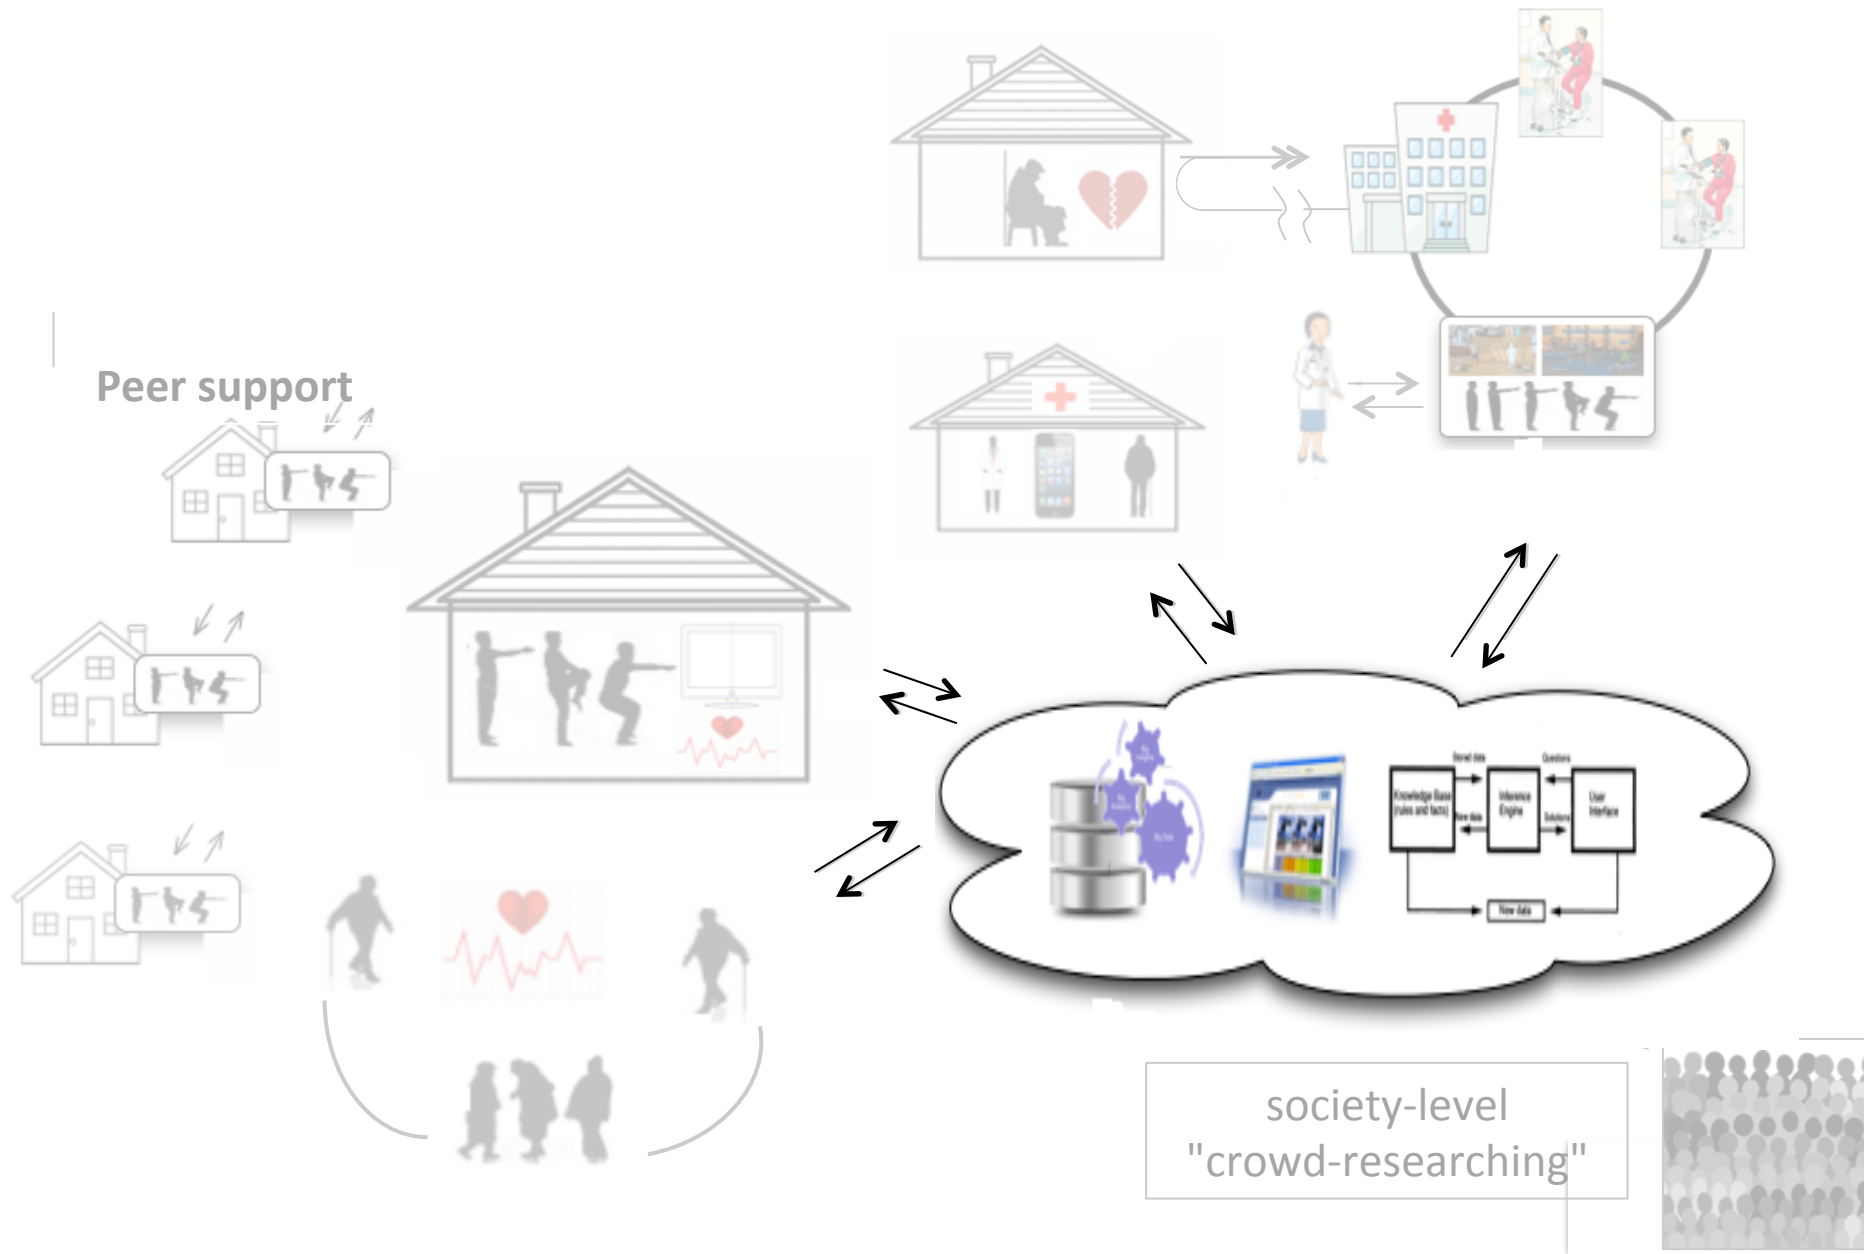

All-day assessment: monitor participants' physiological responses (HR) and physical activity (step count / rate).

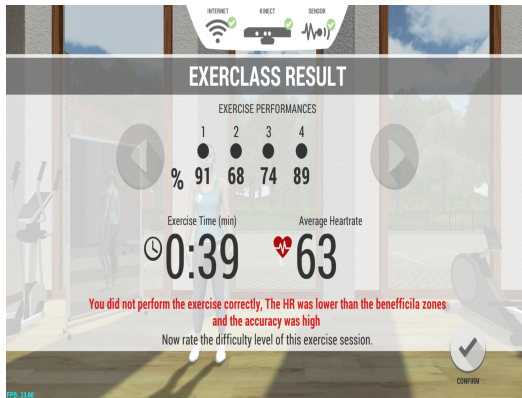

Social connectivity/interaction: will enable small groups of remote participants to exercise together in a virtual space

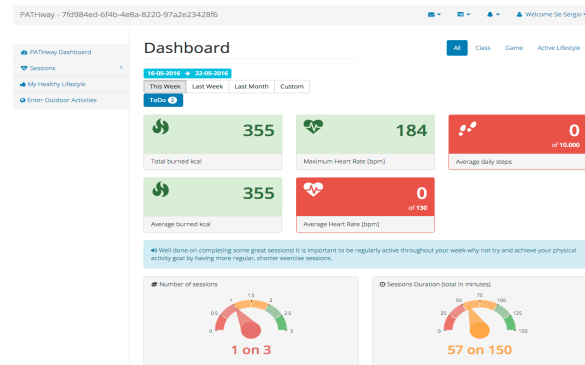

Data mining and modelling - turning data into knowledge

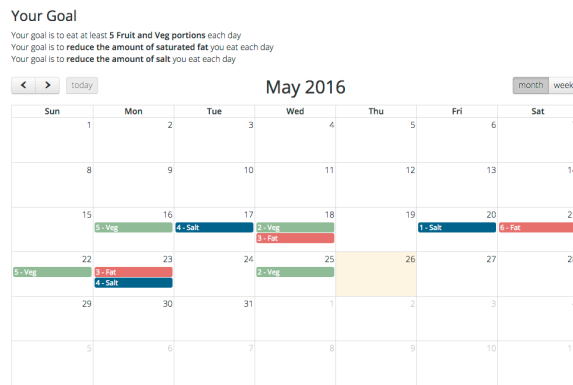

Patient Feedback

Individual Session

Summary: Day, week, month, year

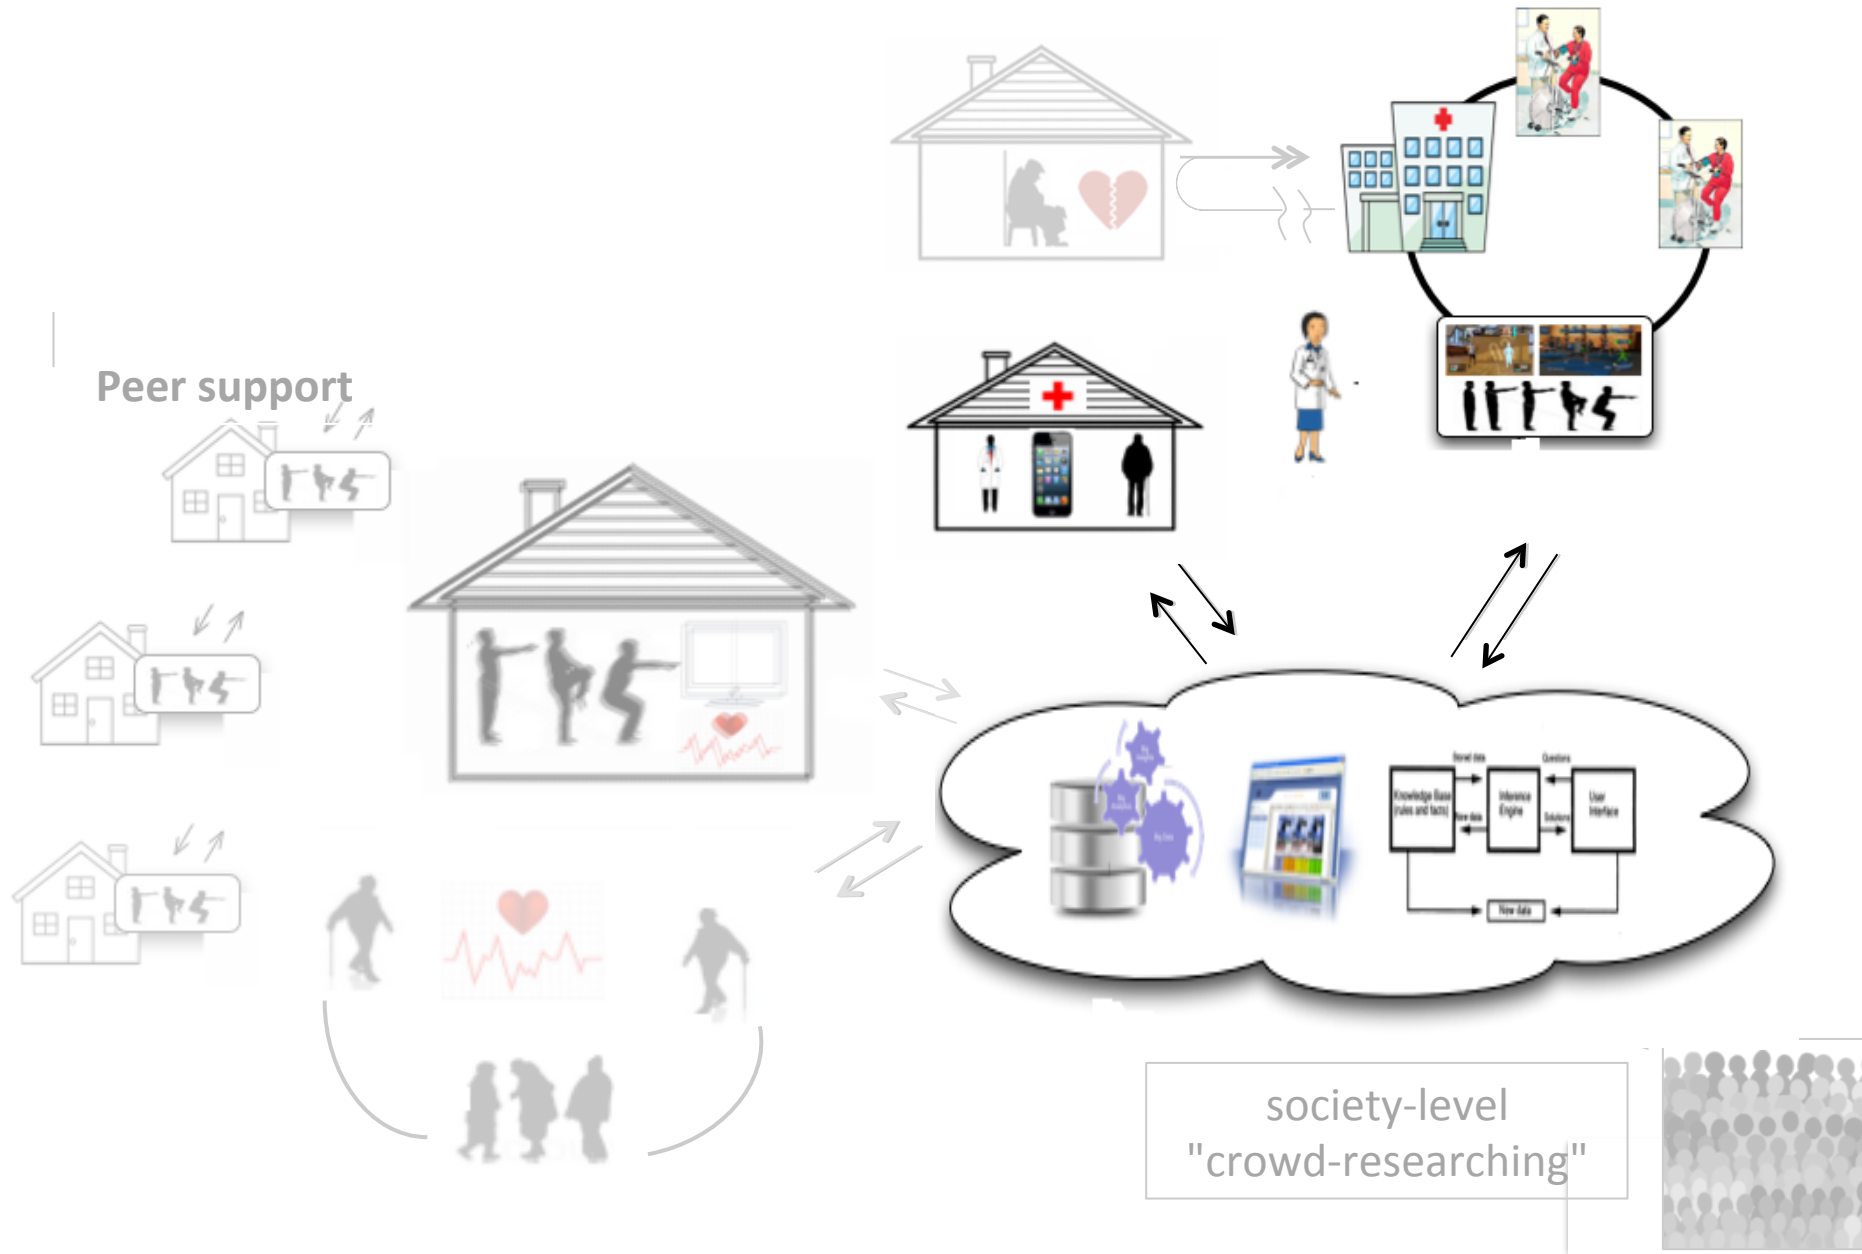

Tracking personal goals

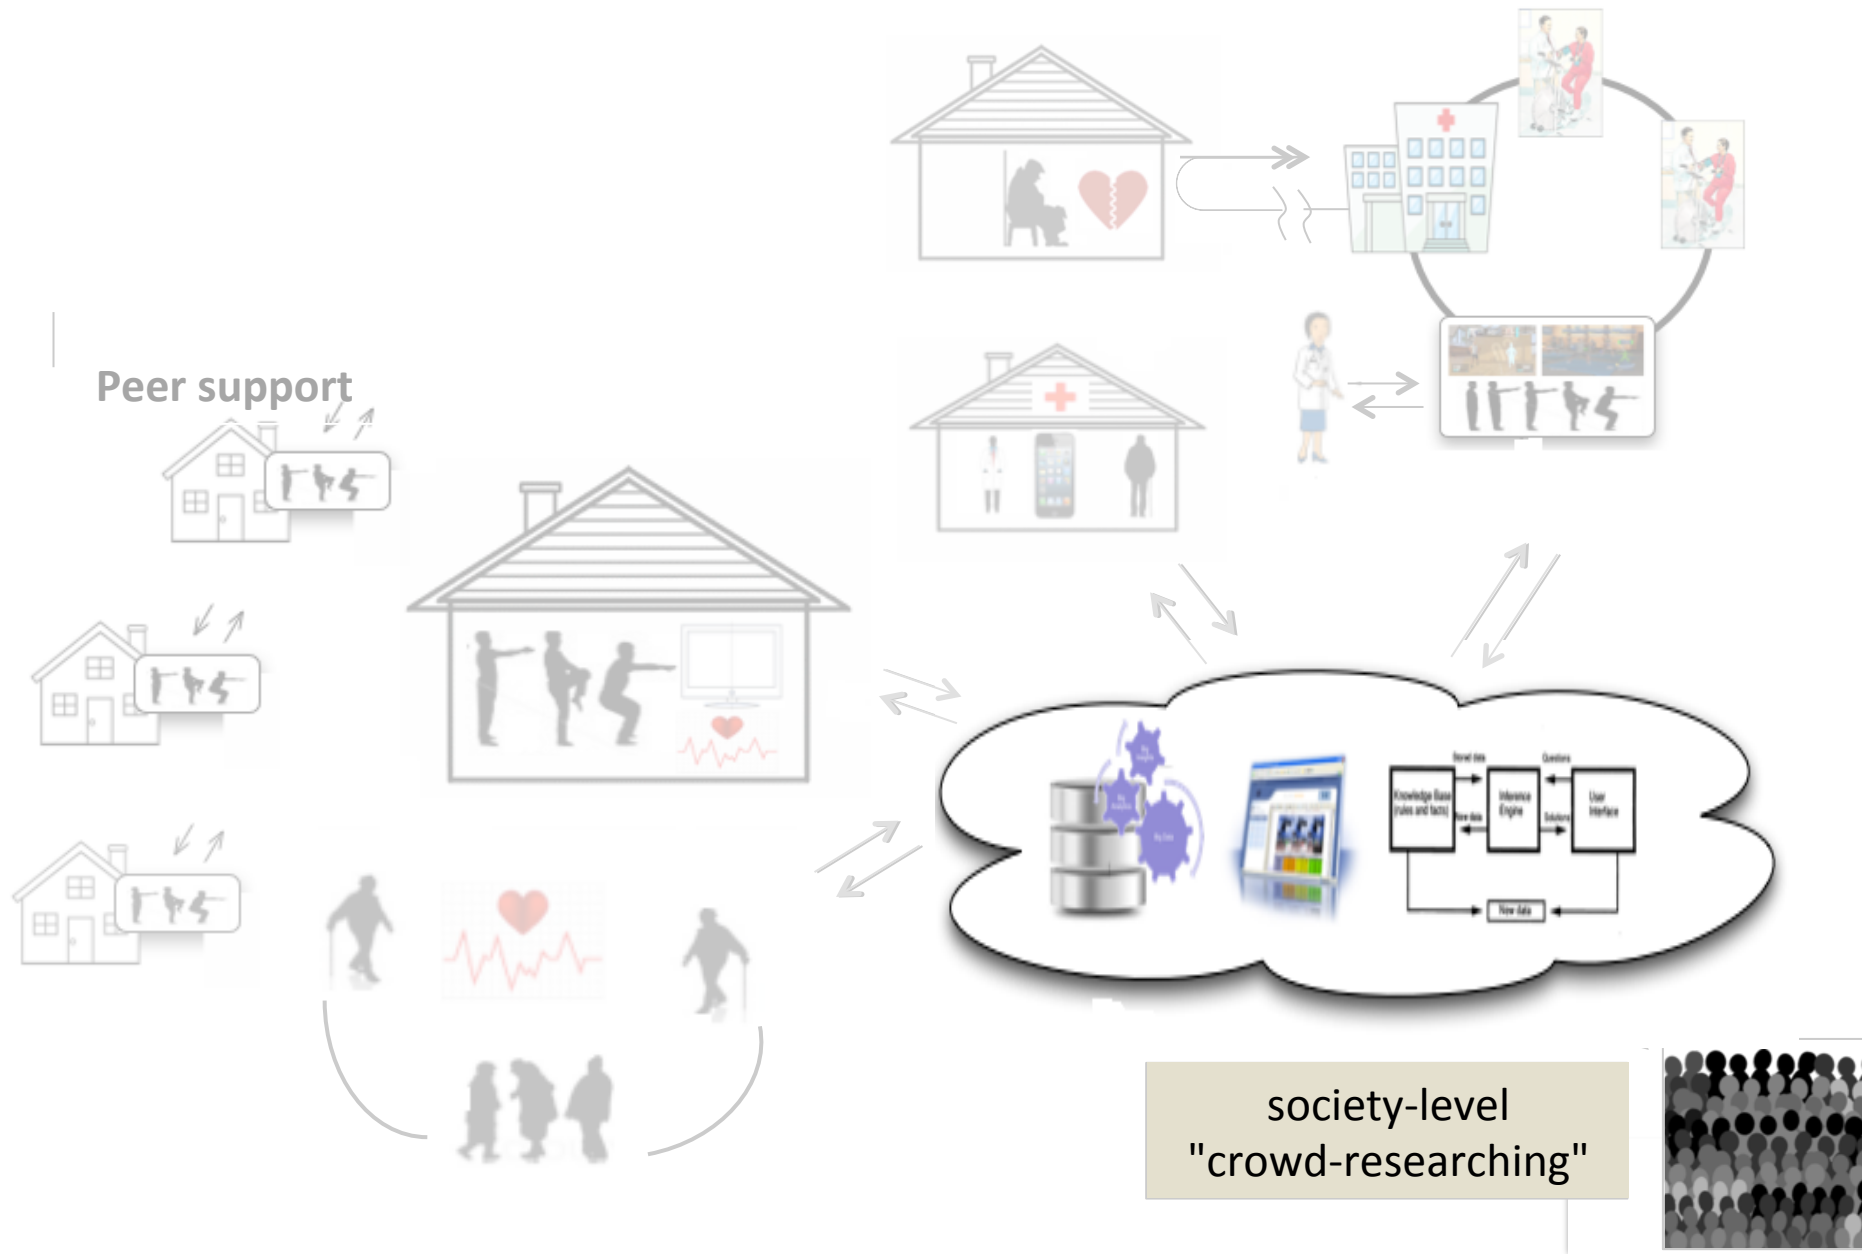

Text notification

Information for the healthcare professionals

Society level crowd research

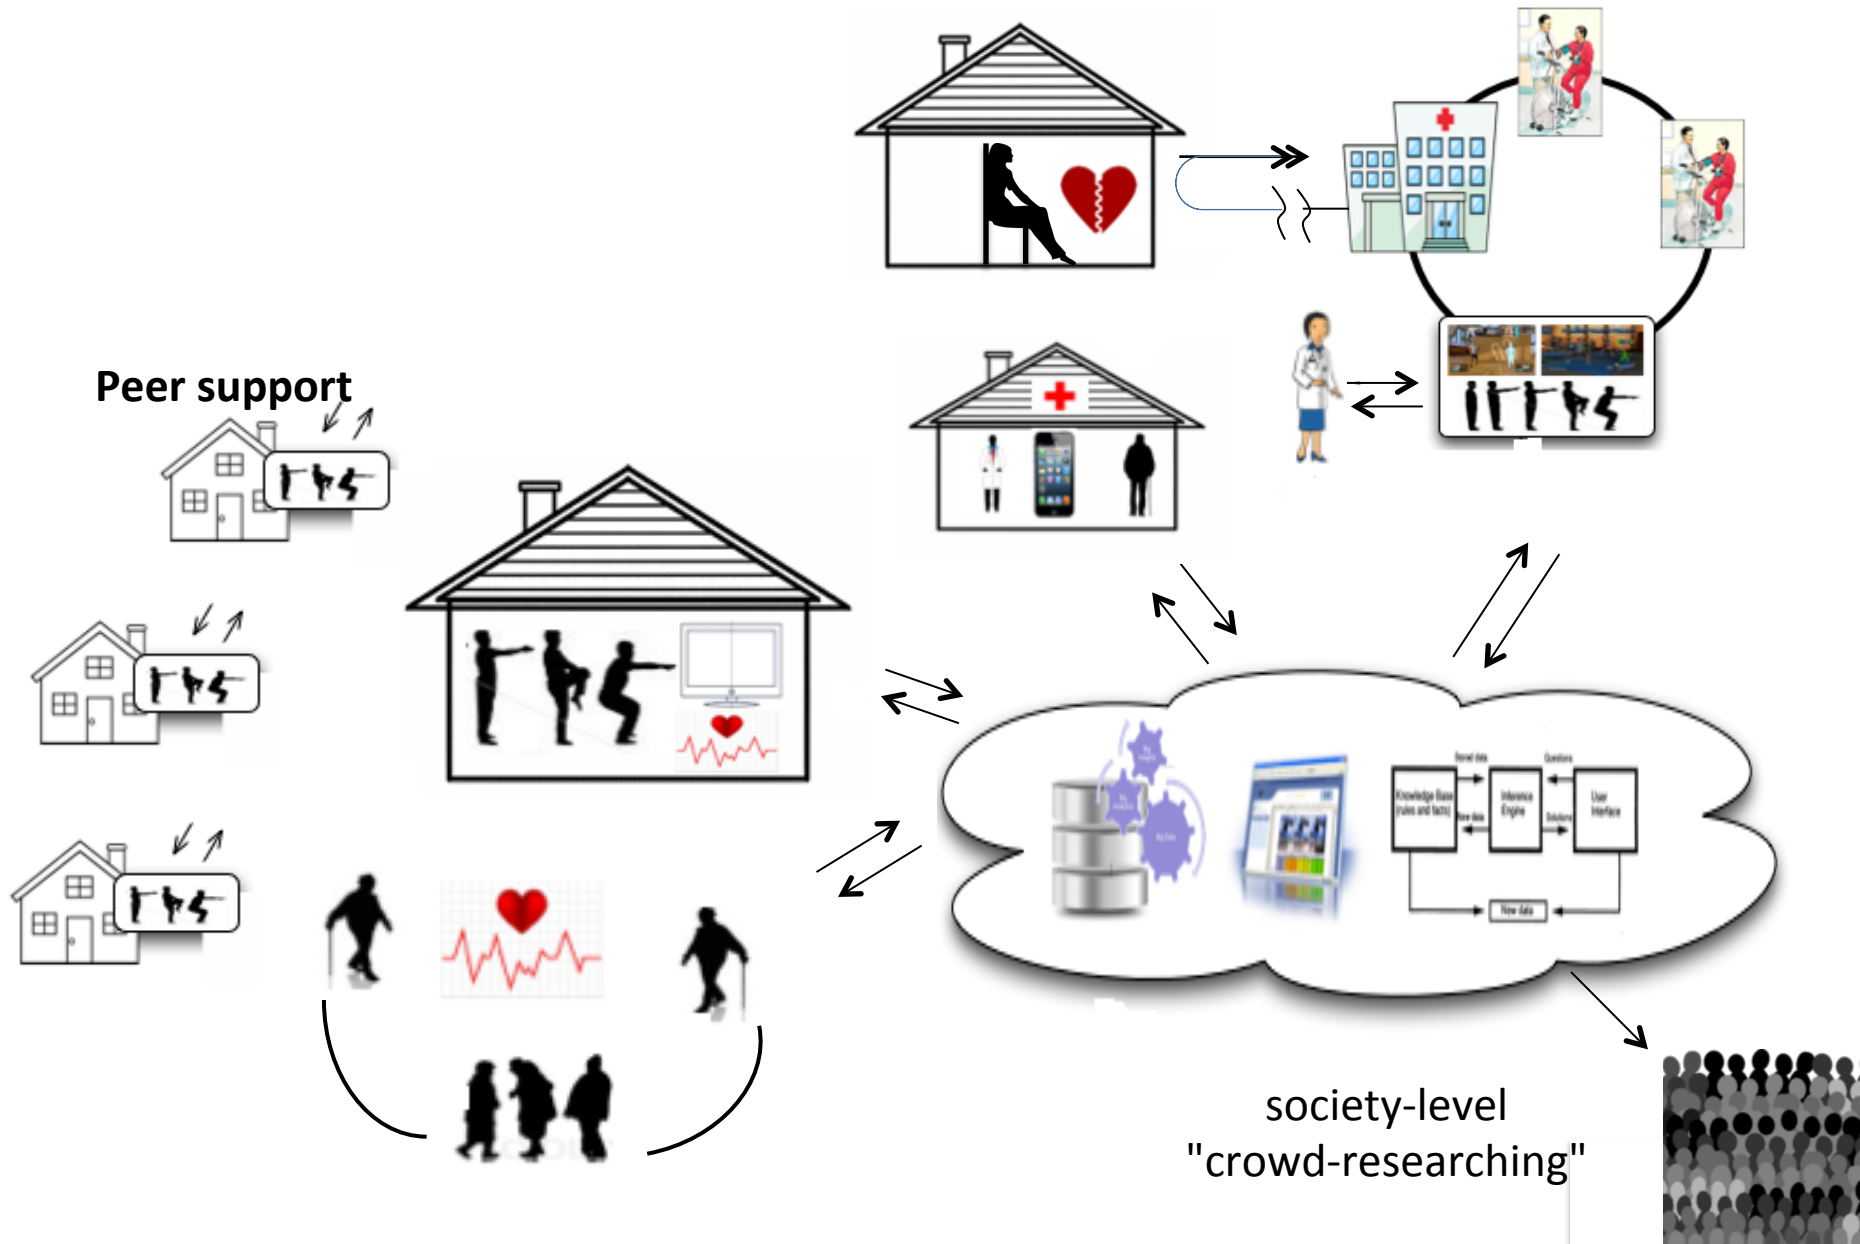

ExerClass

ExerGame

Technology enabled behavioural change as a PATHway towards better self-management of CVD

A Multidisciplinary Team

Thank you
