

# Embedding Employability Toolkit: Superfoods to Boost Your Curriculum's Employability in Higher Education

Link [Email] [Facebook] [Twitter] [LinkedIn]

## Description

Via the lens of graduate attribute development this toolkit highlights best examples of employability activities for higher education curriculum. Designed to enhance employability skills development as class activities and module assessments, namely via the Employability Superfoods, lecturers can enhance students' employability learning with ease.

## Benefit of this resource and how to make the best use of it

Our Award-Winning Embedding Employability Toolkit has been designed to help you, the lecturer, create curricula beneficial to graduates' employment health. Much like a nutrient-rich superfood considered to be especially beneficial for health and well-being, the 20+ Employability Superfoods activities developed for this toolkit will help you present a curriculum that is agile and adaptive to labour market trends and contemporary workplace requirements.

### How to Use Superfoods:

The Employability Superfoods outline detailed stepwise workings, resources and downloads to ensure your preparation time is minimum when deciding to embed employability into curricula. Resources relate to links, library documents, and searchable and downloadable documents, webpages or videos. What's more, they will show you how to embed employability via the lens of graduate attribute development in readily accessible and fun ways.
